German Vessel Seizure Authorized by Congress

The House resterday passed the Cul-berson-Webb Joint resolution providing for the taking over of the interned Ger-man merchant ships in the waters of the United States and its insular possessions, except such ships as were interned in the harbors of the American Virgin Islands.

The resolution authorizes the President to take over the ships and to use them as he may see fit. The resolution as it passed the House was in exactly the form already passed by the Senate so that all that it now requires is the signature of the President to make it a law of the land.
